

Join us at the ACS spring 2025 conference in San Diego for a GEOC symposium!

Broadening Participation in Geochemistry: Bridging People, Science, and Policy to Tackle Community, Regional, & Global Issues that Affect our Planet

Tuesday, March 25, 2025

2:00–6:00 pm PST

San Diego Convention Center, Hall G/H, Room 4

Emily Padston, *Associate Director, University of Chicago*

Broadening access and inclusion through the Synchrotron Earth and Environmental Science program

Matt Landsman, *Assistant Professor, Arizona State University*

Advancing Water Treatment Technologies in Remote Alaskan Communities through Fieldwork, Education, and Fundamental Science

Amy Mueller, *Associate Professor, Northeastern University*

What defines "useful"? A community-engaged process toward cost-effective solution-centered AQ sensor network design and operations

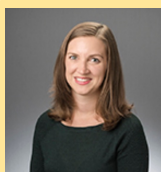

Jacqueline Gibson, *Department Head and Professor, NC State University*

Disparities in Exposure to Lead & Other Contaminants in Drinking Water Resulting from Gaps in Access to Community Water Service in NC, USA

James Blair, *Associate Professor, Cal Poly Pomona*

Between Clean and Green: Lithium, Water, and Climate Justice

Kelly Good, *Assistant Professor, Villanova University*

Training Students to Address Complex, Interdisciplinary Problems Through Community-Engaged International Projects

Alysia Cox, *Associate Professor, Montana Technological University*

Promoting Women and Diversity in Science with Field and Lab Geobiochemistry in Yellowstone National Park and the Clark Fork River Superfund Megasite at Montana Technological University

Organizers: Matt Landsman, Lynn Katz, Stetson Rowles, Ian Bourg
